IOT Platform

About Drumbuffer Analytics

DrumBuffer is a Data to Decision Platform to improve efficiency and profitability of Customers using IOT.

Solutions for Industrial is targeted for maximizing throughput of an equipment or Factory.

Solutions for healthcare are targeted to improve operational efficiency and better customer experience resulting in affordable healthcare.

MY WORK

Tele-ICU APP & WEB:

- Developed a Tele-ICU mobile application focused on healthcare and data analytics.
- Implemented patient monitoring features, including real-time tracking of connected beds.
- Integrated emergency management capabilities for critical scenarios.
- Designed the application to support role-based login credentials, where doctors serve as administrators.

Bluetooth BLE Device App :

- Built a Bluetooth BLE-based app to wirelessly connect and retrieve data from medical devices.
- Collected vital health metrics such as heart rate, pulse rate, blood pressure, blood sugar, and oxygen levels.
- Ensured seamless communication between BLE devices and the application for accurate data representation.

Attendance App with Face Recognition :

- Developed a face recognition-based attendance application.
- Implemented a registration process where users upload their image for initial enrollment.
- Designed a login system that verifies the user's face against the registered image.
- Allowed access to the home page upon successful face recognition
- Home page displays attendance records and related data.

PROJECTS

Crypto Checker | Project | source code **03, 2023**

- Crypto Checker is a **React.js**-based web app that utilizes **APIs** to deliver real-time cryptocurrency data, offering users an interactive platform for monitoring crypto prices and market trends.

Moviedux | Project | source code **04, 2023**

- Developed a React-based movie search engine featuring real-time filtering by genre and a custom "Watchlist" for user bookmarks.
- Implemented a rating-based classification system that categorizes films as Good, OK, or Bad based on their performance scores.

Calculator | Project | source code **09, 2022**

- A simple modern calculator using **HTML, CSS, JavaScript**.
